## Image Processing with MATLAB: Applications in Medicine and Biology

By Prasanna K. Sahoo

CRC Press. Hardcover. Book Condition: New. Hardcover. 451 pages. Dimensions: 9.1in. x 6.2in. x 1.1in. Image Processing with MATLAB: Applications in Medicine and Biology explains complex, theory-laden topics in image processing through examples and MATLAB algorithms. It describes classical as well as emerging areas in image processing and analysis. Providing many unique MATLAB codes and functions throughout, the book covers the theory of probability and statistics, two-dimensional fast Fourier transform, nonlinear diffusion filtering, and partial differential equation (PDE)-based image denoising techniques. It presents intensity-based image segmentation methods, including thresholding techniques as well as K-means and fuzzy C-means clustering techniques. The authors also explore Markov random field (MRF)-based image segmentation, boundary and curvature analysis methods, and parametric and geometric deformable models. The final chapters focus on three specific applications of image processing and analysis. Reducing the need for the trial-and-error way of solving problems, this book helps readers understand advanced concepts by applying algorithms to real-world problems in medicine and biology. A solutions manual is available for instructors wishing to convert this reference to classroom use. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.

### Reviews

*It is great and fantastic. Better than never, though I am quite late in starting reading this one. It has been written in an extremely simple way and is particularly only right after I finished reading this ebook where it actually changed me, affected the way I really believe.*

-- **Orin Blick**

*This ebook is wonderful. It generally fails to price too much. Your lifestyle period will be transformed as soon as you comprehensively read this ebook.*

-- **Otho Bergstrom**
