Brand New Book ***** Print on Demand *****.Excerpt from An Atlas of the Differential Diagnosis of the Diseases of the Nervous System: Analytical and Semeiological Neurological Charts In spite of its apparent complexity, the diagnosis of nervous diseases lends itself better than that of the diseases of most of the other organs to exact path ological analysis. Just as a chemist in analyzing a substance of unknown composition by a series of appropriate tests eliminates from consideration one group of chemical bodies after another until he finally discovers its class and name, so the neurologist subjects a patient to one test after another in definite sequence. As the result of each test he throws out of consideration one or more groups of diseases and assures himself that he has to do with a disease belonging to another definite group. With each successive test the number of diseases constituting a group becomes less, until finally one definite individual disease stands revealed among the few most closely related to it by a comparison of the remaining symp toms characteristic of each. This analytical method is used, I think, by all great teachers...
