

Some problems of fixed point theorems in different spaces

By Rashmi Kenvat

LAP Lambert Academic Publishing Feb 2017, 2017. Taschenbuch. Condition: Neu. Neuware - The book comprises of seven chapters. In chapter -I, we have given a brief history of Fixed Point Theory and its application. In chapter -II, we have introduced the concept of tripled best proximity point in metric spaces. As an application to our main result, we prove some tripled best proximity point theorems in metric spaces. In chapter -III, we have developed tripled coincidence point theorems in ordered cone metric spaces over a solid cone. Chapter -IV is divided into three sections: In All section has deal with the results of Fuzzy metric spaces to establish common coincidence point. In chapter -V, we have proved some periodic point and fixed point theorems for a rational inequality in complex valued metric spaces. Also, we have given an application for our main theorem in complex valued metric spaces. In chapter -VI, we focus on various tools of obtaining Fixed Point such as various kinds of compatible maps (for example: Compatible Maps of Type(A), Type(B), Type(C), Type(P), weakly compatible maps, etc.) for details of tools in Fixed Point Theorems we refer Murthy([124]). We have shown that these pairs satisfy a contractive...

Reviews

The book is fantastic and great. I have got read through and i am confident that i will planning to read yet again once again in the foreseeable future. I found out this book from my dad and i recommended this publication to discover.

-- Prof. Nicole Zieme

This ebook is amazing. I actually have read and i also am certain that i will going to read once more again down the road. I found out this pdf from my dad and i advised this book to discover.

-- Isaiah Swaniawski
