Such is the case with Rich, Reynolds, Arza Gilmore and others we might name. The old rough board box hive; full of cracks and cranies have resisted the ravages of the bee moth often longer than the most beautifully constructed patent hive standing along side. OUR THEORY ABOUT THE BEE MOTH. A hive of bees of ordinary strength, with the presence of a good healthy queen, will resist, of themselves, all encroachments from these depredators; while any quantity of bees, without such presence will fall an easy prey to their ravages. When a queen such as described is present, all is activity; every bee is on duty, guarding the entrance, destroying the eggs of this insect or performing some important office. We have placed a queen in a hive full of miller eggs and worms, and have seen it restored to health. We have seen hives fall of bees, honey, and comb, become a perfect webb in one week without her presence. The destruction of what was regarded as a fine hive, has been witnessed by every apiarian, while one less prosperous in appearance, standing beside it has successfully resisted all encroachments. Hence a hive of bees without a queen, or eggs in a state out of which to form one, is effectually dead. And like a dead carcass, about which the eagles or buzzards are gathered, will soon be removed by these cormorants (the moths) which nature has provided. Queenless..
