DISCRIMINATIVE LEARNING FOR SPEECH RECOGNITION: THEORY AND PRACTICE

Morgan and Claypool Publishers. Paperback. Condition: New. 112 pages. Dimensions: 9.1in. x 7.4in. x 0.4in.In this book, we introduce the background and mainstream methods of probabilistic modeling and discriminative parameter optimization for speech recognition. The specific models treated in depth include the widely used exponential-family distributions and the hidden Markov model. A detailed study is presented on unifying the common objective functions for discriminative learning in speech recognition, namely maximum mutual information (MMI), minimum classification error, and minimum phone word error....
