NL HIERARCHY (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from NL Hierarchy Proof. The result is clearly true for deterministic space bounded oracle machines, so it suffices to show the result for nondeterministic machines. First we show that the length of any query is bounded. Since the query tape is write-only, during a writing phase, each computation-step transition is dependent only on the deleted configuration. Since the machine uses at most space $s(n)$ it follows that the number of distinct deleted configurations is bounded by for some fixed positive constant k . Thus by our model if the machine ever repeats a deleted configuration during a query writing phase, the computation is looping and will continue writing to the oracle tape forever, without entering the query state.
