For companies that have a Web application that requires the strengths of Domino (e.g. Teamrooms, Knowledge Bases, Corporate Portals, Help Desks, Sales Force Automation, Web Meetings - that include 'chat', Project Tracking, Intranets, built in messaging, etc.) and the strengths of WebSphere (e-commerce, Brokerages, B2B Exchanges, Supply Chain Integration, Online Banking, Web Account Access, Web Portals, Extranets, etc.) a combined Domino and WebSphere system would be ideal. This book shows developers how to build applications that combine the strengths of both products. 525 pp. Englisch.
