Excerpt: .obtained by several of the earlier settlers, and many of them have sunk wells and established pumping plants with satisfactory prospects for successful irrigation. The main source of supply is the widespread underflow fed by the scanty rainfall and also by Mimbres River, a mountain stream which normally passes underground near the northwest corner of the county. This water has been accumulating for a long time and now saturates the gravel and sand deposits underlying most parts of the bolsons. Unfortunately the entire area is not underlain by these water-bearing deposits, and in places the water is too deep or too scanty in amount to be utilized. Therefore one of the principal purposes of the investigation was to determine the extent of the area underlain by water-bearing deposits, the depth to these deposits, and the amount of water available. The mountains rising out of...
