Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: .were taken abundantly in tide eddies in Laboratory Cove, at Newport, R. I. The development of the egg is unknown. At the junction of each of the radial tubes with the stomach, in older specimens, clusters of small ovarian-like cells were observed, which resembled undeveloped ova, but I was unable to definitely form an opinion as to their exact character. *Mabella gracilis*, n. g. s. Plate VI. Figs. 2, 3. A single specimen of a very interesting jelly-fish was taken near the close of the month of July. This medusa is of a genus as yet undescribed, and resembles *Dysmorphosa* very closely, with the exception (?) that it has eight radial chymiferous tubes. Gemmation from the proboscis similar to that which has been described in *Lizzia*, combined with the last-mentioned characteristic, makes it a most interesting and exceptionable jelly-fish. The bell has the shape of a...
