By Juhani Norri

Taylor Francis Ltd, United Kingdom, 2016. Hardback. Condition: New. New ed. Language: English . Brand New Book. Medical texts written in English during the late Middle Ages have in recent years attracted increasing attention among scholars. From approximately 1375 onwards, the use of English began to gain a firmer foothold in medical manuscripts, which in previous centuries had been written mainly in Latin or French. Scholars of Middle English, and editors of medical texts from late medieval England, are thus faced with a huge medical vocabulary which no single volume has yet attempted to define. The dictionary covers four lexical fields: names of sicknesses, body parts, instruments, and medicinal preparations. Entries are structured as follows: (1) headword (2) scribal variants occurring in the texts (3) etymology (4) definition(s), each definition followed by relevant quotations (5) references to corresponding entries in the Dictionary of Old English, Middle English Dictionary, and The Oxford English Dictionary...
