

A Reconstruction of the Nuclear Masses in the Lower Portion of Human Brain-Stem (Classic Reprint)

Filesize: 2.77 MB

Reviews

This pdf is wonderful. It really is written in simple terms instead of hard to understand. It's been developed in an exceedingly simple way and it is just after I finished reading this ebook in which in fact modified me, altered the way in my opinion.
(Ollie Powlowski)

A RECONSTRUCTION OF THE NUCLEAR MASSES IN THE LOWER PORTION OF HUMAN BRAIN-STEM (CLASSIC REPRINT)

Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Reconstruction of the Nuclear Masses in the Lower Portion of Human Brain-Stem Throughout this paper, the terms nuclear material and gray matter have been used almost synonymously. Neither of the terms is satisfactorily descriptive, but by them are meant the collections of nerve-cells with attending neuroglia-elements, which go to make up the easily recognizable nuclei, the various substantia?, and the formatio reticularis. Considered narrowly, these masses are merely those in which the cellular elements predominate in amount over the fiber strands. Of the other terms used in this paper, little need be said. Cephalie, superior, and less frequently upper are the adjectives applied in the sense of toward the cerebrum, while caudal, inferior, and lower are used to designate the direction of away from the cerebrum or toward the tail. Method of Reconstruction. To secure the third dimension in this morphological study, the method of Born was adopted - reconstruction by means of wax plates of uniform thickness. By a projection apparatus, drawings of uniform enlargement were made from a series of sections of the human adult brain-stem. This series of over two thousand serial sections comprises one of the loan collections in the neurological series of the Anatomical Department of the Johns Hopkins Medical School. (Brain-Stem No. 2627). The brain-stem was fixed in formalin, embedded in celloidin, and cut transversely, the sections being 40 microns in thickness. The staining was done by the Weigert-Pal method, with counterstaining by carmine. In this present work every fifth section was projected with a constant magnification of 15 diameters; the drawings were made and then corrected by examination of the slide under low magnification; the corrected drawings...
