

New Plane Geometry (Classic Reprint) (Paperback)

By Wooster Woodruff Beman

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from New Plane Geometry In Algebra he has studied, among other things, the equation, and has found that if $A : 15$, a must equal 12 . In Geometry he is to study form, and he will find, for example, that two triangles must necessarily be equal if the three sides of the one are respectively equal to the three sides of the other. Before beginning the subject, however, there are certain terms which, although familiar, are used with such exactness as to require careful explanation. These terms are solid, surface, line, angle (with various kinds of each), and point. As with most elementary mathematical terms, such as number, space, etc., it is difficult to give them simple and satisfactory definition. Explanations can, however, be given which will lead the student to a reasonable understanding of them. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
