VASCULAR RISK FACTORS AND COGNITIVE FUNCTIONING IN NORMAL ELDERLY

SPS Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - Recent research has suggested that vascular disease risk factors (VDRF) may contribute to cognitive impairment. The aim of this study was to determine the relative contribution of VDRF to cognitive functioning and activities of daily living in a community-dwelling cohort of individuals aged 75-90. Participants were questioned about cigarette smoking and alcohol consumption, and a neurologist gathered information..

Reviews

It is just one of the most popular ebook. It normally will not cost too much. I am very easily could get a pleasure of looking at a composed publication.

-- **Rosetta Thompson**

A very awesome publication with perfect and lucid information. It is probably the most awesome book I have read. You may like how the author publishes this pdf.
