The locomotive engine is a high pressure steam engine, mounted on wheels, and used to draw loads on a railroad, or other level roads. It is usually accompanied by a large wagon, called a tender, in which the wood and water, used by the engine, are carried. Fig. 89 represents a side view of the internal construction of a locomotive steam engine; in which F represents the fire box-, or place where the fire is kept; D the door through which the fuel is introduced; G one of the bars of the grate at the bottom. The spaces marked B are the interior of the boiler, in which the water stands at the height indicated by the dotted line. The boiler is closed on all sides; all its openings being guarded by valves. The tubes marked c e conduct the smoke and flame of the fuel through the boiler to the chimney C C, serving, at the same time, to communicate the...
