Next weigh out the cyanid and place it in a small paper sack and then gently drop it into the generator. The operator must close the box or leave the house at once. Where several generators are to be used, as in a large fumigatorium, the sacks of cyanid should be lowered into the generating vessels by means of strings operated at the door. By taking this precaution the operator will avoid any possibility of inhaling the deadly gas. The material should be fumigated for a period of 45 minutes to 1 hour. In case of fumigating houses or large chambers, facilities for opening the doors and windows from the outside must be provided so as not to expose the operator to the fumes. No one should enter the fumigatorium...
