

## Inducing Consciousness on the Way to Cognition

By Glen Davidson

AuthorHouse. Paperback. Book Condition: New. Paperback. 124 pages. Dimensions: 9.0in. x 6.1in. x 0.5in. This book gives a very good account of consciousness, tying it into the informational states of cognition. The advantage of the approach in this book is primarily that it is done according to quite an integrated methodology, beginning with evolutionary considerations and bringing in various scientific, psychological, and philosophical aspects of both consciousness and cognition to show that essentially consciousness belongs to the process of cognition. Consciousness arises from the process of becoming that results from induction in the brain, either in the mode of cognitive induction or as electromagnetic induction. The case for this is made on several grounds, and especially according to the way in which we know things primarily while these are changing. Also it is argued both that the processing of data happens too fast and is too integrated to happen via the relatively slow and low-information transfers at the synapses. Cross-talk between nerves cannot be prevented and has to enter into the consideration of cognition at least, but more importantly such a process explains how it is that we actually can know the information that goes into producing an action. They are, and have to be, the same information, and we become conscious as a part of producing action,...
