Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: . by Dr. Curtis; E. Ruttee; and others. This, which is known as Alhazen's problem, admits of the following geometrical solution: --If C be the centre of the circle and a its radius, take E and F so that $AC \cdot CE = a^2 = BC \cdot CF$; draw the hyperbola-locus of vertex of all triangles whose common base is EF , and the difference of whose base angles = $\angle CEF - \angle CFE$; let H be any one of the four points in which this hyperbola cuts the circle; then, as $\angle ZEFH - \angle FEH = \angle CEF - \angle CFE$, we have $\angle ZCEH = \angle CFH$, and in the triangles ACH, HCE , we have $AC : CH = CE : CH$; therefore $\angle ZACH = \angle CEH$; similarly $\angle ZBCH = \angle CFH$, and therefore $\angle ZACH = \angle ZBCH$, and $\angle ZAHK = \angle ZBHK$, therefore H is one of the required points. 6924. (By Professor Seitz, M.A.)--A triangle is formed by joining three random points within a sphere; prove that the average area (1) of the triangle is $\frac{1}{2} \pi r^2$, and (2) of its inscribed circle is $\frac{1}{2} \pi r^2 \log 2$. 6917. (By J. L. Mckenzie, B.A.)--A straight line XY cuts the tangents at two given points A and B on a given circle in L and M respectively, and the circle itself in C and D ; then (1) if the circles ABL, ABM cut XY in a and b respectively, prove $Ca = D/3$; and (2) if the circles passing through L and M , and touching...
