Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from *Vegetation of the Peak District* The study of vegetation in the British Isles, begun by the late Robert Smith, is being vigorously prosecuted by the members of the British Vegetation Committee. Already, several vegetation maps and memoirs have been published of parts of the central and northern Pennines, Scotland, Ireland, and Somerset by W.G. Smith, Lewis, Pethybridge, Praeger, Rankin, and myself, in addition to several minor publications by these and other members. Whilst this book was going through the press, Tansley's *Types of British Vegetation* appeared, where, for the first time, a sketch of the plant formations and plant associations of the whole of the British Isles is given. Several vegetation maps, of Hampshire, the Isle of Wight, Norfolk, north-eastern Yorkshire, Lanarkshire, and other districts, have been finished by various members of the Vegetation Committee, but cannot be published at present owing to lack of funds. The present volume and the accompanying maps owe their publication to the generosity of the Royal Society and the Royal Geographical Society, whom I take the present opportunity of thanking on my own behalf and on that of British phytogeographers and ecologists in general. I fear, however, that, until government recognition is taken of the botanical survey of the country, publication of this kind of work will continue to languish. The present work is the result of a botanical survey of the Peak District of the southern Pennines begun in January, 1903. In preparing the vegetation maps, the Ordnance maps on the scale of six inches to the mile (1: 10560) were used for field work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more...
