

Vapor-Liquid Equilibrium Behavior of Tethered Nanoparticles

By Siladitya Mukherjee

LAP Lambert Academic Publishing Jun 2013, 2013. Taschenbuch. Condition: Neu. Neuware - In this work, molecular simulations are used to calculate the vapor-liquid equilibrium (VLE) of polymer-grafted nanoparticles under a wide range of conditions. Brownian dynamics simulations are performed using coarse-grained model, generic enough to be applicable to a wide range of systems. The VLE is calculated using the quench molecular dynamics technique. This work demonstrates a strong connection between the VLE and the grafting architecture. The role of graft topology for systems with low surface coverage is also presented in this work. 76 pp. Englisch.

Reviews

This composed book is wonderful. It is amongst the most awesome book i actually have read through. You will like the way the author create this publication.

-- **Miss Fanny Osinski V**

This sort of ebook is everything and made me hunting ahead of time and more. I am quite late in start reading this one, but better then never. I found out this publication from my dad and i suggested this publication to discover.
