

Risk Assessment, Genetic Counseling, and Genetic Testing for Brca-Related Cancer: Systematic Review to Update the U.S. Preventive Services Task Force Recommendation: Evidence Synthesis Number 101

By U. S. Department of Health and Human Services

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 368 pages. Dimensions: 11.0in. x 8.5in. x 0.8in.This systematic review is an update of the evidence for the U. S. Preventive Services Task Force (USPSTF) on the effectiveness and adverse effects of risk assessment, genetic counseling, and genetic testing for breast cancer susceptibility gene (BRCA)related cancer in women who do not have cancer but are potentially at increased risk. Its purpose is to evaluate and summarize evidence addressing specific key questions important to the USPSTF as it considers new recommendations for primary care practice. In 2005, based on results of a previous review, the USPSTF recommended against routine referral for genetic counseling or routine BRCA testing for women whose family histories are not associated with increased risks for deleterious mutations in breast cancer susceptibility gene 1 (BRCA1) or breast cancer susceptibility gene 2 (BRCA2) (D recommendation). The USPSTF also recommended that women whose family histories are associated with increased risks for mutations in the BRCA1 or BRCA2 genes be referred for genetic counseling and evaluation for BRCA testing (B recommendation). The USPSTF concluded that the potential harms of routine referral for genetic counseling or BRCA...

Reviews

A whole new eBook with a brand new point of view. It is really simplistic but surprises in the fifty percent of the publication. I am just effortlessly can get a delight of looking at a written ebook.

-- Mariano Gleichner

It in a single of my favorite pdf. Yes, it is engage in, still an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.
