The book is an asset to students, scholars, and seasoned practioners alike. --International Perspectives in Victimology Lisa Nerenberg provides the first comprehensive look at elder abuse prevention trends and strategies. Drawing from existing models and examining salient factors, she outlines approaches to intervention that consider victims and perpetrators and engage communities and service systems. She also offers meaningful response to the many challenges endemic to elder abuse work. As a result, Lisa gives hope to the field. Beginning as a grassroots advocate a quarter century ago in San Francisco, Lisa developed and tested many viable elder abuse prevention programs herself through the local elder abuse network before exploring best practices elsewhere. This unique evolution and perspective gives her the depth and breadth of understanding needed to write a book like this, able to resonate equally with adult protective service workers struggling to manage caseloads of vulnerable elders, law enforcement personnel trying to prosecute abusers, and academics searching for effective responses to the problem. ---- Georgia J.
