Brand New Book ***** Print on Demand *****.Excerpt from The Child and Nature, or Geography Teaching With Sand Modelling, Vol. 1 Geography spans a lifetime; but as a common-school study, it consists of a natural sequence of subjects beginning in the primary grades and unfolding along the entire course. Every branch in the advanced work springs from a root in the elementary, and it is this unity of growth which alone merits the name of science. The series of relations which link man to the mother earth can be properly traced only by considering the land masses, not as mere areas, but as solid forma, possessing not only length and breadth, but also the very important dimension of height. By this term is meant, not the mere location of plateaus and mountain ranges, but the varying elevation of the whole land surface above the sea-level, resulting in continental slopes. Is it not the threefold extension, or rather the relation of elevation to area, which conditions the distribution of life? and is it not the dimension of height alone, which divides the surface into the...
