Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Notes on Practical Physiology: For the Use of Students of Medicine This short description of the experiments usually performed in classes of Practical Physiology has been written specially for students attending the class of Practical Physiology at the University of Otago. The subject is treated in the order of the systematic lectures to enable students to study the theoretical and practical sides of the subject together. Inasmuch as Physiology, besides being an excellent ground for general scientific training, is a subject of direct importance in Medicine, due attention has been paid to those methods of clinical research that can be profitably pursued by medical students of the second year, but it is almost unnecessary to say that many of the experiments described are not directly applicable to the problems of disease. It would be difficult to give a list of all the works consulted in the preparation of these exercises, but for the convenience of students who wish to extend their knowledge, the author can recommend the following books to which he himself is much indebted, viz., the Practical Exercises in Stewarts Manual of Physiology; Milroy sPractical Physiological Chemistry; Porters Introduction to Physiology; and Practical Physiology by Beddard, Edkins, Hill, Macleod, and Pembrey. For those who can read German, Thierfelder sedition of Hoppe-Seyler sHandbuch der phys. u.path. chem. Analyse, and the Handbuch der phys. Methodik edited by Tigerstedt, now appearing in parts, are the best authorities on chemical and experimental work respectively. I am indebted to my friend, Mr. J. Brown, for the drawings in perspective. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical...
