## HOW FREE CATIONIC POLYMER CHAINS PROMOTE GENE TRANSFECTION

Springer International Publishing Jun 2013, 2013. Buch. Condition: Neu. Neuware - In this PhD thesis, Yue Yanan addresses a long-overlooked and critical question in the development of non-viral vectors for gene delivery. The author determines that those uncomplexed and cationic polymer chains free in the solution mixture of polymer and DNA facilitate and promote gene transfection. Furthermore, by using a combination of synthetic chemistry, polymer physics and molecular biology, Yue confirms that it is those cationic polymer chains free in..
