Springer Berlin Heidelberg Sep 2009, 2009. Taschenbuch. Condition: Neu. Neuware - th TSD 2009 was the 12 event in the series of International Conferences on Text, Speech and Dialogues supported by the International Speech Communication Association (ISCA) and Czech Society for Cybernetics and Informatics (CSKI). This year, TSD was held in Plzen (Pilsen), in the Primavera Conference Center, during September 13-17, 2009 and it was organized by the University of West Bohemia in Plzen in cooperation with Masaryk University of Brno, Czech Republic. Like its predecessors, TSD 2009 highlighted to both the academic and scientific world the importance of text and speech processing and its most recent breakthroughs in current applications. Both experienced researchers and professionals as well as newcomers to the text and speech processing field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of text and speech processing found in the TSD conference a forum to communicate with people sharing similar interests. The conference is an interdisciplinary forum, intertwining research in speech and language processing with its applications in everyday practice. We feel that the mixture of different approaches and applications offered a great opportunity to get acquainted with current activities in all aspects of language communication and to witness the amazing vitality of researchers from developing countries too. This year's conference was partially oriented toward semantic processing, which was chosen as the main topic of the conference. All invited speakers (Frederick Jelinek, Louise Guthrie, Roberto Pieraccini, Tilman Becker, and Elmar Nottger) gave lectures on the newest results in the relatively broad and still unexplored area of semantic processing. 448 pp. Englisch.
