

## Collected Studies from the Research Laboratory. Department of Health, City of New York

Filesize: 2.36 MB

### ***Reviews***

*This publication might be well worth a read, and much better than other. It really is simplified but excitement inside the 50 % of the book. You will not feel monotony at whenever you want of the time (that's what catalogues are for concerning when you check with me).  
(Imogene Bergstrom)*

## COLLECTED STUDIES FROM THE RESEARCH LABORATORY. DEPARTMENT OF HEALTH, CITY OF NEW YORK

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .Pig No. 1 well; November 30, discharged. Pig No. 2 well; November 30, discharged. 4. Virus 1 c.c.+salt solution 1 c.c. (control). Pig No. 1 died of rabies November 20. Pig No. 2 died of rabies November 21. From this test it is evident that this serum in the proportion of 1 to 4 of virus is hardly sufficient to kill all of the organisms, one of the pigs inoculated with this mixture dying of rabies with a prolonged incubation and the other escaping. That the killing effect in such a serum is due to specific properties in it, caused by the treatment, has been proved by numerous experiments with the sera of normal dogs, horses and rabbits, all of which sera are entirely without effect. It has been difficult to prove that this serum obeyed the same laws, in its action as bactericidal sera, owing to the fact that the living animal must be used for its test. The serum inactivated by heat may be reactivated by the blood of the animal used in the test. This question will be studied in the future by applying the method of BordetGengou. 4. The question as to whether the increase in immune body caused by the Pasteur treatment was confined to the blood serum alone or whether the central nervous system was involved gave rise to the following experiment: A rabbit was treated at intervals from January 2 to April 15; on April 24 it was bled...
