## SYNTHESIS & CHARACTERIZATION OF DIATOM INSPIRED NANOCOMPOSITES

Condition: New. Publisher/Verlag: Scholar&apos;s Press | Synthesizing Nanomaterials With Diatoms and On Diatoms | This work addresses two novel methods to synthesize composite nanomaterials inspired by marine microalgae called diatoms. Diatoms are inspirational sources of silica structures, ordered at micro- to nanoscale. The fabrication of materials with well-defined and controllable nanoscale features has been of great interest for chemical, optoelectronic, environmental, and medical applications. There is an urgent need for cheap methods to mass-produce complex nanoscale structures with a variety...

### Reviews

*Comprehensive information for book fanatics. it had been writtem really completely and useful. I am happy to explain how this is the greatest publication i have read through in my very own life and can be he finest pdf for ever.*

-- **Virginie Collier I**

*It is great and fantastic. I could possibly comprehended every little thing using this published e publication. I found out this pdf from my i and dad encouraged this book to discover.*

-- **Destini Muller**

*This book is great. it was writtem quite flawlessly and helpful. You will not truly feel monotomy at whenever you want of your time (that's what catalogs are for concerning if you ask me).*

-- **Sterling Kris**
