Date: 2003 -05 With the rapid economic development. global environmental resources to predatory development. ecological environment is getting worse. a serious threat to sustainable human development. Coordinated development and environmental protection. with the system point of view to look at. with the systems engineering approach to solve the economic development and environmental protection of the relationship between the chapter. and then seek solutions to environmental and economic contradictions of the chapter an effective way. Environmental system mathematical model is written in this basis. The book is divided into seven chapters. focuses on the basics of mathematical modeling of pollutants in environmental media in the mathematical description of the basic law of motion. and surface water. groundwater. air. multi-media environment and the ecological environment and nature of the relevant model ; the same time. some of the most commonly used surface water. air quality forecast modeling software to do a brief introduction; In addition. the appendix of the ICM received in 1999 and 2000 Outstanding Paper Award for the best profile. The book covers the basic mathematical modeling of environmental systems involved in the most representative areas. with a strong intellectual. operational and practical value. This book is mainly applied to environmental research. environmental planning and design. management information; also available for institutions of higher education undergraduate students. teachers and participants ICM research learning. Contents: 1 environmental systems and mathematical models 1.1 and environmental systems Overview 1.3 Overview 1.2 Mathematical model Mathematical model environmental systems 2 2.1 base model environmental quality pollutants in environmental media campaign features 2. 2 Derivation of the basic model of environmental quality environmental quality 2.3 analytical solution of...
