

The Breast Reconstruction Guidebook: Issues and Answers from Research to Recovery

By Kathy Steligo

Johns Hopkins University Press. Paperback. Condition: New. 288 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. Since 2002, The Breast Reconstruction Guidebook has been the best resource on this topic for women who have had a mastectomy. Equal parts science and support, it is filled with stories that illustrate the emotional and physical components of breast reconstruction. Kathy Steligo, a gifted writer and breast cancer survivor who has twice had breast reconstruction, compassionately answers women's questions about how they will respond emotionally and physically to losing a breast, whether to treat or prevent breast cancer. Steligo provides detailed descriptions of the various surgical options for mastectomy and reconstruction, as well as information on choosing and paying for a surgeon, preparing for and recovering from surgery, and handling the many practical details and difficult decisions women will face along the way. A road map of the mastectomy and reconstruction journey, this book gives women the comprehensive, unbiased details they need to make their own informed decisions about whether reconstruction and which reconstructive option is right for them. Readers learn how breasts can be recreated using implants or their own tissue and the advantages and disadvantages of each option. Surgery timelines, recovery, and potential problems (and...
