

## Application of MCDM Techniques in Mine Reclamation Process

By Ebrahimabadi, Arash

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Application of MCDM Techniques in Mine Reclamation Process. "Green mining" is defined as technologies, best practices and mine processes that are implemented as a means to reduce the environmental impacts associated with the extraction and processing of metals and minerals. After a mine totally excavated, it should be reclaimed and closed. Mine reclamation plays a major role in achieving the green mining goals. Reclamation process is regarded as a Multiple Criteria Decision-Making (MCDM) problem that needs to be managed appropriately. This book presents a brief review of MCDM application for mine reclamation. | Format: Paperback | Language/Sprache: english | 76 pp.

### Reviews

*Thorough guide! Its such a very good go through. It is really simplified but surprises in the 50 % from the ebook. You will like how the blogger write this ebook.*

*These kinds of publication is everything and made me hunting ahead of time and more. I have got read through and i also am confident that i am going to gonna study yet again yet again later on. Its been printed in an extremely basic way in fact it is only after i finished reading this pdf in which in fact transformed me, alter the way i believe.*
