Excerpt from The National Eye Institute Annual Report: Fiscal Year 1978 A more detailed analysis of the distribution of vision research training re. Sources by program is provided in the table on the following page, (table Thd continuing objective of the National Eye Institute is to support research training relative to its five programs: Retinal and Choroidal Diseases, Corneal Diseases, Cataract, Glaucoma, and Sensory and Motor Disorders of Vision. Research training is encouraged in all the medical sciences disciplines as they apply to these five National Eye Institute programs. Foremost among these in terms of needs perceived by the National Advisory Eye Council and of Opportunities in vision research are: immunology, genetics, pharmacology, epidemiology, physiology, biostatistics, biochemistry, developmental biology, psychophysics, physiologic optics, and experimental and clinical pathology. With the exception of the Sensory and motor Disorders of Vision program, the level of training support generally parallels the research grant support for a particular program (footnote This suggests that the state of knowledge for the long term advances in vision research depends upon the fundamental disciplines such as biochemistry, physiology, immunology, and...
