Reviews

This publication is indeed gripping and intriguing. It is actually written in basic terms and not difficult to understand. I am just pleased to explain how here is the greatest publication we have read through during my own lifestyle and could be the best pdf for at any time.

Excerpt: . . . the arbitrary interference of man, by pairing specimens which answer his purposes, and preventing their intercrossing with others. Man by artificial selection, produces varieties in regard to which it at last becomes a mere dispute about words to refuse recognition as new species: if something similar to this selection could be proved to have taken place in the domain of unfettered Nature, we should see our way to explain the ramification of organic life into the diverse forms and species that we have before our eyes. 54. Is there, then, something in Nature causing the variations which have arisen in generations of plants and animals to be preserved and increased causing, further, as a consequence of this, not all equally, but chiefly only certain specially organized individuals, to propagate themselves in the course of generations and where are we to ask for this principle, this universal leaven The direction in which the Englishman searched for and found this is very characteristic. He was under no necessity to search for it at all, as everywhere in his native land he saw around him energetic industry, and the astonishing effects of his principle. He only needed to transfer competition from the world of man into the household of Nature. Darwins Struggle for Existence is nothing else but the expansion of that into a law of Nature, which we have long since recognized as a law of our social and industrial life. We see organic beings possessing the...
