MULTITIER ARCHITECTURE

Alphascript Publishing. Taschenbuch. Condition: Neu. Neuware - In software engineering, multi-tier architecture is a client-server architecture in which the presentation, the application processing, and the data management are logically separate processes. For example, an application that uses middleware to service data requests between a user and a database employs multi-tier architecture. The most widespread use of 'multi-tier architecture' refers to three-tier architecture. The concepts of layer and tier are often used interchangeably. However, one fairly common point of view is...
