Braids and Self-Distributivity

By Dehornoy, Patrick

Book Condition: New. Publisher/Verlag: Springer, Basel | This is the award-winning monograph of the Sunyer i Balaguer Prize 1999. The book presents recently discovered connections between Artin's braid groups and left self-distributive systems, which are sets equipped with a binary operation satisfying the identity $x(yz) = (xy)xz$. Although not a comprehensive course, the exposition is self-contained, and many basic results are established. In particular, the first chapters include a thorough algebraic study of Artin's braid groups. | A: Ordering the Braids.- I.
