

Smart grid renewable energy systems design(Chinese Edition)

Filesize: 1.23 MB

Reviews

Completely essential read through ebook. This can be for all who statte there was not a well worth reading. You wont really feel monotony at at any time of your own time (that's what catalogs are for relating to if you request me).

(Maud Mitchell)

SMART GRID RENEWABLE ENERGY SYSTEMS DESIGN(CHINESE EDITION)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pub Date: Unknown Pages: 437 Publisher: Machinery Industry Press List Price: 118.00 yuan Author: Hani book. Kay (U.S.). Chang-wet translated Press: Machinery Industry Press ISBN: 9787111395447 Pages: 437 Edition: 1 Binding: Paperback: 16 Published :2013-1-1 Printing time: Words: 584000 commodities identification: 22.915.566 Description smart grid renewable energy systems design and renewable energy. smart grid and microgrid basic concept. the three areas of power engineering (power systems engineering. power electronics and energy conversion system) combined discusses smart grid renewable energy micro-grid system design problem. The author of this book has an overview of the evolution of energy use in the history of mankind. the basic concepts of the grid. the depth investigated microgrid converter modeling problem and the smart grid system design. and discusses the power grid and microgrid trend analysis and grid failure research. One of the important features of smart grid renewable energy systems design is a combination of the instance discusses the theoretical and engineering issues. Each chapter first proposed a key engineering problems. and then gives the mathematical model of problem-solving. and then introduces the MATLAB simulation platform. to illustrate the problem-solving steps. Each chapter also includes problem-solving cases. exercises. and related references. About the author the directory translator sequence of the original book sequence of the original book Preface Acknowledgements Chapter 1 Energy and civilization 1.1 Introduction 1.2 fossil fuel the 1.3 energy depletion 1.4 an alternative energy: nuclear energy 1.5 Global warming 1.6 era of power system 1.7 green renewable energy 1.7.1 geothermal energy of hydrogen 1.7.2 solar and photovoltaic power generation 1.7.3 1.7.4 1.7.5 ethanol. 1.8 units of energy and convert 1.9 power costs estimated biomass 1.10 Summary Exercises References Chapter 2...
