Excerpt from Factors Influencing the Expansion of the Nurse s Role in Primary Care Settings: A Study of the Graduates of a Nurse Practitioner Program Murphy, Juanita F Role Expansion or Role Extension Nursing Forum, Vol 9, No. 4, 1970nurse by the physicians with whom she works and the patients with whom she has contact) which will have significant effect on the ultimate impact of the program. The study will concern itself with two interacting social systems. First, we will consider the nurse trainees. Their skills, knowledge, attitudes, and expectations will strongly influence patient care. The second social system is the back home environment to which the nurses return. This social system is composed of patients, physicians and other staff, and family and friends. All of these groups are important and interact with one another to determine the nurse s acceptance of her new role.
