

## Some Geological Relations Between the Constitution of Soil Materials and Highway Construction (Classic Reprint) (Hardback)

By George Elbert Ekblaw

Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Some Geological Relations Between the Constitution of Soil Materials and Highway Construction Although there has been highway engineering almost ever since man found it desirable to travel from place to place, the modern profession had its inception hardly more than a quarter of a century past. In that brief span of time it has achieved distinction favorably comparable to that attained by other older fields of engineering. When paved highways were first constructed, they were designed by engineers who were experienced in constructing paved city streets, gravel or stone pikes, railways, and similar developments. Since then the technique of highway construction in all its phases has progressed to a high degree, and searching investigations into many of its problems have been undertaken and aggressively pursued.
