FROM CONDITIONING TO CONSCIOUS RECOLLECTION: MEMORY SYSTEMS OF THE BRAIN

To read **From Conditioning to Conscious Recollection: Memory Systems of the Brain** eBook, make sure you refer to the link under and download the file or have accessibility to additional information which might be highly relevant to FROM CONDITIONING TO CONSCIOUS RECOLLECTION: MEMORY SYSTEMS OF THE BRAIN ebook.

Oxford University Press, USA. Paperback. Condition: New. 600 pages. Dimensions: 9.1in. x 6.0in. x 1.1in. This cutting-edge book offers a theoretical account of the evolution of multiple memory systems of the brain. The authors conceptualize these memory systems from both behavioral and neurobiological perspectives, guided by three related principles. First, that our understanding of a wide range of memory phenomena can be advanced by breaking down memory into multiple forms with different operating characteristics. Second, that different forms of memory representation are supported by distinct brain pathways with circuitry and neural coding properties. Third, that the contributions of different brain systems can be compared and contrasted by distinguishing between dedicated (or specific) and elaborate (or general) memory systems. A primary goal of this work is to relate the neurobiological properties of dedicated and elaborate systems to their neuropsychological counterparts, and in so doing, account for the phenomenology of memory, from conditioning to conscious recollection. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
