This work re-evaluates the life and thought of George Tyrrell, one of the most prominent of the modernist thinkers, on the centenary of his death. A Jesuit priest, he was dismissed from the order and excommunicated from the church for his views. The problems he tried to grapple with the relation of science to religion, questions of meaning and modernity, issues of the articulation of Christian ideas in modern culture have a peculiarly contemporary ring. These essays attempt to set Tyrrell s work within the framework of early twentieth-century Catholic ideas and to draw some conclusions about his thinking for present day concerns.
