Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .their 37th annual report for the year 1915, were used. From each of these values the water areas of rivers, lakes and great ponds within the exterior boundary lines were deducted. Areas of rivers were measured from the best obtainable plans on file in this office, made from actual survey, using also, in some cases, various plans on file in other State departments. Plans of lakes and great ponds were measured from surveyors large scale plans where obtainable, many being furnished by various city and town officials. Some, notably water supply reservoirs, were obtained from information on file with the State Department of Health or from local engineers. All other ponds were measured as shown on the original plane table sheets of the State topographical map, scale 1: 30,000, or four times the area of the State maps themselves. Ponds crossed by town lines were divided...
