ERRORES GENIALES QUE CAMBIARON EL MUNDO

BOOKET, 2015. Condition: Nuevo. Todos nos equivocamos. Nadie es perfecto. Y eso incluye también a cinco de los más grandes genios de la historia de la ciencia; Charles Darwin, William Thompson, Linus Pauling, Fred Hoyle y Albert Einstein. Sin embargo, sus meteduras de pata fueron fundamentales en su investigación científica y condujeron hacia algunos de los más importantes hallazgos científicos de la historia de la humanidad. Es más, según Mario Livio, la ciencia se basa en el error. Se avanza conforme se desmontan falsas ideas. Cuando era joven, Albert Einstein trató con insistencia de concebir una forma de describir la evolución del universo basado en la teoría general de la relatividad. No obstante, fue víctima de una noción errónea de simplicidad estética. Fred Hoyle era un eminente astrofísico que ridiculizó una teoría emergente sobre el origen del universo a la que peyorativamente catalogó de "Big Bang". Ambos, junto a Darwin y su teoría de la selección natural, Kelvin y su cálculo erróneo de la edad de la Tierra y Pauling y su modelo fallido de la estructura del ADN, fueron todos ellos hombres geniales y fascinantes. Sus meteduras de pata fueron esenciales en el progreso científico y ayudaron a profundizar en el conocimiento de la evolución de la Tierra, la vida y el universo.
