Gardner, together with an account of the soils of the Quadrangle by S. C. Jones. While it is to be regretted that the report on the economic resources is not final in character, its usefulness will be appreciated by all who are interested in the development of the region covered by it. The page-maps showing the areas of No. 9 coal, and the discussion of structure with reference to the possible occurrence of petroleum and natural gas, are of much practical value to prospectors.
