

Major Process Equipment Maintenance and Repair: Volume 4 (Hardback)

By Heinz P. Bloch, Fred K. Geitner

ELSEVIER SCIENCE TECHNOLOGY, United Kingdom, 1997. Hardback. Condition: New. 2nd edition. Language: English . Brand New Book ***** Print on Demand *****. This updated edition is an invaluable source of practical cost-effective maintenance, repair, installation, and field verification procedures for machinery engineers. It is filled with step-by-step instructions and quick-reference checklists that describe preventive and predictive maintenance for major process units such as vertical, horizontal, reciprocating, and liquid ring vacuum pumps, fans and blowers, compressors, turboexpanders, turbines, and more. Also included are sections on machinery protection, storage, lubrication, and periodic monitoring. A new section examines centrifugal pumps and explains how and why they continue to fail. More new information focuses on maintenance for aircraft derivative gas turbines. This revised edition gives special attention throughout to maintenance and repair procedures needed to ensure efficiency, performance, and long life.
