Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Determination of the Parallaxes of Fifty Stars, and Description of the Instruments and of the Methods Employed The major part of the observing energy of the staff of the Sproul Observatory has for some time been devoted to the determination of Stellar Parallax. I have given in the following pages a brief description of the instruments used, the methods of observing and reduction that have been employed, and the results, together with the data of observation and measurement, for fifty stars. These results have been obtained through the efforts of several persons. The work has been prosecuted according to plans outlined by the writer. Associated with him at various times have been Dr. Samuel G. Barton, Hannah B. Steele, John H. Pitman, and the Reverend Walter A. Matos. Doctor Barton, Mr. Pitman, and the writer have given during the time the work was in progress the major part of their efforts to other college duties, each having had a comparatively heavy teaching roster. Miss Steele also had some other college duties. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
