

Coded Spectroscopy for Ethanol Detection in Diffuse Media

Filesize: 6.39 MB

Reviews

I actually started off looking over this publication. Indeed, it really is play, nevertheless an amazing and interesting literature. Its been printed in an exceedingly basic way and is particularly just right after i finished reading this ebook by which actually altered me, affect the way i believe.

CODED SPECTROSCOPY FOR ETHANOL DETECTION IN DIFFUSE MEDIA

To get **Coded Spectroscopy for Ethanol Detection in Diffuse Media** eBook, please refer to the web link beneath and download the file or have accessibility to additional information which are relevant to CODED SPECTROSCOPY FOR ETHANOL DETECTION IN DIFFUSE MEDIA book.

VDM Verlag Dr. Müller. Taschenbuch. Book Condition: Neu. 22 cm. Neuware - Optical sensing in the visible and near-infrared regions of the electromagnetic spectrum allows for non-invasive analysis of tissue. With the use of Raman spectroscopy, a high degree of chemical specificity is available with laser powers that are harmless to living tissue. Such systems, however, are plagued by the low efficiency of the Raman scattering process by molecules and the intense background fluorescence from some biological materials. To address these drawbacks, we have investigated the use of coded spectroscopy to make Raman spectroscopy more feasible in routine use. By coding the input aperture of a dispersive spectrometer, throughput gains of 10-100 are possible over a slit spectrometer. The theory, design, and performance characteristics of this static aperture coding will be discussed in this work. In addition, by coding the excitation light sources one can filter out the shifting Raman signals from the stationary fluorescent background. The theory and implementation of an expectation maximization algorithm for Raman signal reconstruction will be analyzed. The design of a multi-excitation, coded-aperture Raman spectrometer will be described. 88 pp. English.
