

Major Threats for Oil Security in Persian Gulf Region

By Robert Fiedler

Grin Verlag. Paperback. Condition: New. 28 pages. Dimensions: 8.6in. x 5.8in. x 0.4in. Essay aus dem Jahr 2009 im Fachbereich Politik - Internationale Politik - Thema: Frieden und Konflikte, Sicherheit, Note: 1, 6, Macquarie University, Sprache: Deutsch, Abstract: Particularly emerging nations such as China, India, or Brazil will contribute to increased oil consumption, rising from 83 million barrel per day in 2004 to 118 million barrels per day in 2030 (Energy Information Administration, 2007). In the face of this situation, it comes with no surprise that the world is now entering a challenging period for energy supply, due to the limited resources and production problems now facing conventional (easily accessible) oil (Energy Committee at the Royal Swedish Academy of Sciences, 14. 10. 2005). Therefore, oil supply security has become a priority in political agendas and given an extreme dependence on supply from the Middle East holding more than 60 of the global oil reserves (Energy Committee at the Royal Swedish Academy of Sciences, 14. 10. 2005) this region has become a focus for oil importing countries. Since this region has witnessed a variety of wars, conflicts, terrorist attacks and other disruptions that caused large losses of oil supply (Horsnell, 2000, p....
