

Biosensors for the Environmental Monitoring of Aquatic Systems Bioanalytical and Chemical Methods for Endocrine Disruptors The Handbook of Environmental Chemistry Water Pollution

By -

Springer. Paperback. Condition: New. 278 pages. Dimensions: 9.3in. x 6.1in. x 0.8in. sector. This ensured eventual transfer of the technology demonstrated at the workshops and Technical Meetings to marketable devices. BIOSET provided assistance for researchers from European laboratories to meet to exchange ideas, use equipment, and establish a basis for new joint projects. The secretariat of the Concerted Action BIOSET supported the Technical Meetings. There were three Technical Meetings held, two in Berlin in 1997 and 1998, and the third in Barcelona, in April 2000. The goal of these technical meetings was to join different research and industrial teams to evaluate the performance of their biosensor technology in field conditions with common and standardized surface and waste waters. As a result of these field experiments, the additional information that biosensors can offer to environmental monitoring was also evaluated. Thus, these three Technical Meetings were useful accompanying measures and practical additions to the currently organized yearly workshops. The concerted action BIOSET was followed by the SENSPOL network. The 1st SENSPOL Workshop was held on the 9th May 2001 on Sensing Technologies for Contaminated Sites and Groundwater at the University of Alcalá. There was one special Workshop on Genotoxicity Biosensing...
