Excerpt from Industrial Photography: Being a Description of the Various Processes of Producing Indestructible Photographic Images on Glass, Porcelain, Metal and Many Other Substances IT may be said that there is no industry to which the processes of photography are not applied. Lithography, engraving and typography have, by their means, been enriched with comparatively costless and rapid mechanical processes for the reproduction of drawings, Oil paintings, portraits and views taken from nature which hitherto required the talent of trained artists, much time and expense. The ornaments of cabinets, mantel-pieces, etc are now made with engraved plates; tiles and imitations of decorated ivory and wood, from photo-reliefs and photo-intaglios, the latter also serving to produce the emcmx cloz sonnes; and for years engravings and etchings on glass-plates, enamels on metals, painting en g?saz lle or in colors on window glass, porcelain, pottery, etc., have been produced by processes requiring but little practice to arrive at success.
