SYNTHESIS & PHARMACOLOGICAL EVALUATION OF NOVEL HYDRAZONE DERIVATIVES

Synthesis &
pharmacological evaluation
of novel hydrazone
derivatives

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Hydrazones and their derivatives constitute a versatile class of compounds in organic chemistry. These compounds have interesting biological properties, such as antiinflammatory, analgesic, anticonvulsant, antituberculous, antitumor, anti-HIV and antimicrobial activity. Hydrazones are important compounds for drug design, as possible ligands for metal complexes, organocatalysis and also for the synthesis of heterocyclic compounds. Preparation, increased hydrolytic stability relative to imines, and tendency toward crystallinity are all desirable characteristics of hydrazones. Due to these...
