Excerpt: . . . belt, or part of machine that men are likely to get caught in should, when practicable, be guarded; and when not so protected should be reported, and every dangerous condition, defective car, engine, machine, careless practice or custom should be reported to some member of the safety committee or other proper officer in order that the same may be remedied before, and not after, some one is killed or injured. Safety postal cards are furnished for that purpose. A switchman had kicked car in on track No. 10 and afterwards kicked some cars in on other tracks. Then he rode a car down on the track next to track No. 10. Another switchman, before he threw the switch for the last cut, noticed that the first car was close, measured the distance in the usual way, thought it would clear, but it was too close to clear a man, and the switchman, who was riding on the side of car, was knocked off and killed. (See fig. 3.) Rule No. 963 requires that cars must be pushed in on siding far enough to clear. Why not do it If it had been done, this mans life would not have been sacrificed and it would have taken less time to do it than it did to make a report of the accident. During the year 1913 we have had six other men injured from the same cause. August 13, 1913,...
